

Natural Silver Lined Socks

Available from:- ARRC, Pathology North Building, John Hunter Hospital New Lambton Heights NSW 2305
or
Pathology North Collection Centre, 89 Nelson St Wallsend NSW 2287 ph. 49556966

Foot Odour Silver fibre in BEST4FEET® will eliminate 99.9% of bacteria within one hour resulting in an instant reduction of foot odour.

Foot Perspiration (Hyperhidrosis) Silver will enhance the evaporation of moisture, therefore foot perspiration is reduced. A dryer foot climate is created. Blisters and swollen skin can be prevented. The silver fibre becomes more effective in a warm or wet environment.

Cold Feet Silver minimises the radiative heat loss by actively reflecting 95% of the body's energy back to the skin. BEST4FEET® socks with silver fibre are therefore much warmer when compared to conventional socks. Silver has one of the lowest radiant heat loss rates and therefore keeps warmth longer. Heat not reflected to the body is stored. BEST4FEET® keep warm in winter, cool in summer.

Athletes Foot The organism Mycosis (fungus) responsible for Athletes Foot will spread in a humid environment and with temperatures conditions below 33°C. The silver in BEST4FEET® is anti-mycotic and will destroy the living base of the fungus. This is achieved by regulating the temperature (to body core temperature 37° C) and reduction of perspiration (by evaporation management).

Heavy Legs Silver in BEST4FEET® VITAL long socks helps to activate the blood circulation by creating a passive magnetic field. Reducing **oedema** and helping to prevent **Deep Vein Thrombosis (DVT)**. Prevent bacterial infections of the skin.

Static Charges Silver has the highest electrical conductivity rating therefore static electricity can be extremely efficiently dissipated resulting in ESD* safe socks suitable for use in EPA** environments.

BEST4FEET® are proven medical products, free from any hazardous substances tested to OEKOTEX 100 standard. They are being applied in medical Podiatry, Dermatology, Diabetic Treatment and for Occupational Medical Purposes. Also suitable to use for **Dermatitis, Hyperhidrosis and Eczema**.

References: Products tested by NAMSA (USA), TOKAI University (Japan), OEKOTEX 100, TUV - Product Safety Group (Germany), Textile Institute Thüringen Germany) * ESD = Electro Static Discharge ** EPA = Electrostatic Protection Area **BEST4FEET®** with Silver are Lauer listed EU Medical Products Class I with PZN (pharmaceutical central no.) They are textiles, produced according to OEKOTEX 100 standard, free from harmful substances and have been tested widely in Germany and other countries.

Textile Content 66% Combed Cotton, 20% polyamide, 9% Natural Silver Fibre, 5% Elastane

Natural Silver Lined Gloves

Do You Suffer With Cold Hands or Fingers?

If so, these new seamless light weight gloves could be a dream come true as they have been proven to help keep the hands warmer and ward off a **Raynaud's** attack.

Specialised medical product using safe and natural pure silver which helps provide medical benefits and natural healing which can help ease suffering and pain. They are made using new seamless technology for a smoother and more comfort fit with light stretch for that super fit and comfort allowing them to shape perfectly to the wrist, hand and fingers. These silver gloves are light weight with fingertip design, perfect for anyone suffering from cold or aching hands. Made using extra fine soft cotton and natural pure silver they reflect the natural warmth from the body, soothing aching joints and hand muscles.

Natural pure silver minimises any radiative body heat loss by actively reflecting 95% of the body's energy back to the skin. As the gloves contain natural pure silver they will keep your hands much warmer when compared to conventional products. Silver also has one of the lowest radiant heat loss rates and therefore keeps you warmer for longer.

Raynaud's is a distressing condition in which the blood is temporarily prevented from reaching the fingers and toes. In its most severe form it is very painful, and in secondary Raynaud's ulcerations can occur which may become gangrenous and lead to amputation.

Scleroderma is a disease affecting the connective tissue. Scleroderma means hard skin but the hardness is not limited to the skin because the internal organs and their blood supply may become damaged. The cause is still unknown and treatment is inadequate. These gloves are designed to be worn either on their OWN or as LINERS with other gloves.

Seamless Fingerless

Touch screen friendly

They can be hand washed at 40°, flat dried and smoothed to shape without any loss of medical performance or comfort. The gloves show an extremely low tendency to shed. The gloves are totally pollutant free, scientifically tested and Oeko-tex 100 and CE approved. The medical and security effects described have been proven by many International institutions around the world. The silver fibre is 100% natural and certified. The silver lined gloves and socks are recommended by a number of health and wellbeing organisations including the Raynaud's & Scleroderma Association of UK and the Autoimmune Resource and Research Centre of NSW Australia.
